UNITED STATES DEPARTMENT OF AGRICULTURE
U.S. Extension Service

Instructions for ordering will be found in the 1942-43 catalog of slidefilms. Authorization blanks will be furnished on request to Extension Service, United States Department of Agriculture, Washington, D. C.

Note. Contract terminates, and prices shown are subject to change, on June 30, 1943.

- - -

Care and repair of farm machinery. No. 628.
Released 1942. (Univ. of Mo.; ES)

Drawings show in detail how to properly fit, adjust, remove, replace implement parts; how to keep your engine working best. Good information crowds each frame, and the lecturer may wish to read from the screen. No notes go with the slidefilm. (49 frames, \$0.50.)

Labor efficiency on the farm. No. 630. Re-
leased March 1943. (ES)

In major jobs and minor details of farm work, know how to make best use of worktime of

Washington, D. C.

Issued April 1943

hired help and your own the year round. Plan your work; make work light and save time; save lost motion of men and equipment; grow crops to yield high; handle labor intelligently. (48 frames; single, \$0.50; double \$1.)

Finding minutes. No. 638. Released April 1943.
(ES; N. J. Ext. Service)

A slidefilm of drawings. If you are losing time and zest in your homemaking, the opening frames remind you where you may be at fault; the rest show that planning your work and knowing the right thing to do, be it large or small, indoors or out, frees you for health, leisure, fellowship. (43 frames; single, \$0.50; double, \$1.)

Gardening for victory, part I, planning and planting the farm garden. No. 634. Released January 1943. (ES; BPI)

Each member of the Jones family has a part in growing their victory garden. Maples in bloom tell us when work begins. We see how Dick treats the seed to guard against plant diseases; how deep he plants and how far apart; how Jane protects seedlings from insects; how they grow more than one crop on the same plot. Slidefilm No. 635 will carry the story to its close. (42 frames; single, \$0.50; double, \$1.)

Gardening for victory, part II, the farm garden
brings results. No. 635. Released Feb-
ruary 1943. (ES; BPI)

The Jones family victory garden that Slide-
film No. 634 showed us how to plant now is
growing fine. Dick and Jane carefully tend
it. We see how they serve dust and poison
to insects when they show up; how they keep
their plants well; how they keep down weeds;
the crops they have in the end for canning
and storing. (57 frames; single, \$0.55;
double, \$1.25.)

New gardener, The. No. 641. Released April
1943. (ES; N. C. Ext. Service)

The slidefilm charts the beginner's course
simply and in detail through the main steps
in gardening. We see how to prepare the
ground; how to plant various seeds, how far
apart, and not too thick or deep; how and
when to transplant, weed, stake, harvest.
(49 frames; single, \$0.50; double, \$1.)

Cattle grubs, or heel flies. No. 637. Re-
leased 1942. (EP&Q; ES)

Only in its grub stage, at the end of its
9-month journey through the animal's body
tissues, can you destroy this pest. Here
you see various controls applied, some best
for farm herds, others for range. You also

see seasonal and life cycles, attack on cattle and their defense, close-ups, distribution. (33 frames; single, \$0.50; double, \$0.90.)

Contoured acres fight. No. 639. Released 1942.
(SCS; ES)

Farm on the level and save water, fertilizer, soil. Your contoured acres will grow more crops; this means more food, supplies, clothing for the home and the war fronts. This slidefilm carries the story without lecture. (29 frames, \$0.50)

First things first. No. 640. Released January 1943. (SCS; ES)

Companion to No. 639, on contouring, this slidefilm shows how the grassing of waterways controls erosion. Contouring holds runoff on land of gentle slope; grassed waterways direct it on greater slopes. (25 frames, \$0.50.)

Any bonds today? No. 636. Released 1942. (ES)

Souvenir copy of score goes with this illustrated songslide. (19 frames, \$0.50.)
